

Card Payment Technology

WASH is an industry leader, not only in quality products and service, but also in innovations like electronic card payment systems. Safe and secure, this technological advance allows customers to add value onto a payment card, which works like a debit card that can be reloaded at the customer's convenience.

The options are as numerous as the benefits, for both you and your customers:

- Card Systems remove cash from the premises, which deters break-ins and vandalism.
- Customers can fund and reload their laundry cards using debit or credit cards at secure Add-Value-Stations on site or by going online and using our quick and easy Load It! option.
- Laundry cards can also be used to restrict laundry room access to your residents only.

WASH is committed to being an industry leader and delivering the best possible solutions to our partners.
